

January 12, 2009

A backup tape containing member information was delayed in transit to PERSI's Coeur d'Alene office over the Christmas/New Year holidays and delivered on January 8, 2009. After PERSI's investigation of the delay and because of formatting of the tape, PERSI has concluded it is highly unlikely that any information on the tape was or will be accessed or misused; however, PERSI has not been able to verify the location of the tape during the entire delay. Therefore, while PERSI does not believe that there has been a breach, this notice is provided. Idaho Code Section 28-51-105
